

SUPER HAWK

The brief for our design team was a difficult one - produce the most competitively priced trap available, suitable for individual use but which can match the performance of those found on commercial ranges.

The design solution was the Super Hawk - it can throw clays at almost one per second allowing you to create a true following pair whilst its powerful motor means it can throw targets 300 feet. If that speed and distance are not challenging enough it will allow you to use midi clays to really test your skill. It is the largest single stack machine in our range with a capacity of either 65 standard or midi clays. As a single user machine a number of additional options can be fitted to the Super Hawk including the ATA Base, Footswitch or even a wireless remote release.

- Holds 65 clays
- Throwing distance of 300 feet
- Powered by 12 volt battery
- Quality motorgear unit and clutch for 3/4 cocking ensures smooth operation and long life
- 1 year warranty
- Throws standard clays and midi clays via a quick adjustment to the stack
- Comes with 160' release cable and quality release switch

FOR THE BEST IN CLAY TARGET
THROWERS SINCE 1985

Weight	77 lbs
Height	47"
Capacity	65 Clays
Shipping Weight	99 lbs

Option	Description
ATA Base	Great addition for any small single stack machine. Quick and easy to fit machine on to. Has three different movement angle settings.
Two wheel Trolley	Makes any sporting Promatic machine fully portable. There is a place for the battery and it comes with hard tyres, so no punctures to worry about.
Footswitch	Ideal for solo use as it allows the shooter to release targets while keeping both hands on the gun. It is a heavy duty unit designed to take field use.
Extension Cable	160' extension cable for increased distance between the shooter and trap.
Single Channel Radio	Say goodbye to trailing wires and allow for quick course changes. This high efficiency unit allows wireless use of any Promatic launcher. Has a range of up to 600 feet.
